

All projects data, documents
and deadlines in one platform

... for the Management
of European **H2020**
Research Projects

EUCoord2020 is a web based platform designed for an easy and efficient management of H2020 Research Projects. Starting from the proposal writing, it assists coordinator and partners through the whole Project life, assuring a tremendous saving in time and minimizing mistakes.

It's particularly useful for the handling of activities to be scheduled and for the tracking of deadlines, thanks to the automatic alerts and reminders, with the addition of Gantt charts generation and continuous updates.

The platform also collects accounting data and assists partners with the data insertion and the coordinator to check and validate with confidence.

In addition, EUCoord2020 can automatically generate a wide range of reports and charts in compliance with H2020 requirements.

is the result of
**10+ years of
experiences**
in fostering and coordinating
European
co-funded Projects

**... and
more:**

- EUCoord2020 costs are eligible
- Project Data available 24 hours a day, via web, from any platform
- Data safety is protected by https communication protocol
- Accurate help on line

FOR FREE

1

PROPOSAL WRITING

The drawing up of the proposal is fully assisted to drive the coordinator up to the proposal submission. **Special features are designed to** build the consortium, to set-up the project architecture and to define and re-allocate the budget. Any **last minute modification can be implemented and managed** without difficulty.

RIA, IA, CSA, SME instruments proposals templates are included.

2

PROJECT MANAGEMENT

The whole project structure, in terms of **Work Packages, Tasks, Deliverables and Milestones**, is fully managed by the platform. The consortium data, mailing lists and documents are **archived and always available in the last updated version**. The **scheduling** of the Project is easily handled and kept on track by **automatic reminders** intelligently produced from the Gantt Chart and partners submitted activities. Pop-up windows track the **history of changes** for each data.

3

ACCOUNTING

Each Partner has protected access only to their own Costs and Efforts tables. Partners are **assisted step by step** in their declarations and are periodically reminded to insert their own progress data. **The Coordinator checks and approves or rejects** all data inserted by Partners, being assisted by **warning alerts** in case of data inconsistency. The related **tables and charts are automatically generated**, and can be sorted by partner, activity, WP etc.

4

REPORTING

Based on the project scheduling, the list of requested reports, **H2020 compliant**, is automatically provided for each reporting period. Reports are **generated automatically based on project status and accounting data**, and can be **easily edited and modified** by the Coordinator. **Additional graphical charts** can be produced and integrated to increase quality of reports.

5

PROJECT WEB SITE

The Project web-site can be easily **created, customized and managed by the Project Coordinator**. A basic starting web site, tailored for Research projects, is provided together with all hints and features to modify it. Several **public and private areas with different access levels** can be created where documents, notifications and news are constantly available.
